Preface	vii
1. INTRODUCTION TO THERAPEUTIC APHERESIS: PRINCIPLES, PHYSIOLOGY, AND PATIENT MANAGEMENT	1
Introduction	1
Apheresis Instruments	2
Principles of Apheresis and Blood Component Exchange	5
Physiology of Therapeutic Apheresis	14
Patient Evaluation and Management	17
Adverse Events During Apheresis	27
References	35
2. CYTAPHERESIS.....	41
Introduction	41
Thrombocytapheresis	43
Therapeutic Leukocytapheresis	45
Extracorporeal Photopheresis	51
Peripheral Blood Progenitor Cell Collection	57
Autologous MNCs Manipulated Ex Vivo	60
References	62
3. THERAPEUTIC PLASMA EXCHANGE	69
Introduction	69
Hematologic Disorders and Dysproteinemias	69
Neurologic Diseases	93
Renal Diseases	104
Solid Organ Transplantation	109
Rheumatic Diseases	113
Metabolic Diseases	116
References	120

4.	ERYTHROCYTAPHERESIS.....	137
	Introduction.....	137
	Standard Technique	137
	Isovolemic Hemodilution	140
	Urgent Need	141
	Side Effects.....	141
	Monitoring	142
	Vascular Access	142
	Indications.....	143
	References.....	153
5.	PEDIATRIC THERAPEUTIC APHERESIS .	159
	Introduction.....	159
	Technical Considerations	160
	Adverse Reactions	168
	Erythrocytapheresis	170
	Therapeutic Plasma Exchange	175
	Leukocytapheresis	181
	References.....	185
6.	SELECTIVE DEPLETION.....	191
	Introduction.....	191
	LDL Apheresis	192
	Staphylococcal Protein A Immunoabsorption	
	Columns	201
	Membrane Differential Filtration	209
	ABO Antigen-Specific Immunoabsorption	211
	Liver Support Systems	212
	Summary.....	213
	References.....	219
	Appendix	223
	Index	233
