@ESaidenberg @ThatLabChick @MalcolmNeeds54 @BloodBankEasley @DrNMD2 @dayand @theduardonunes @thereebsperry @RADeSimone @ushing_melissa @TimHannonMD @lifeandplasma @AmyHDeekenMD @DrSandyMinck @tcoylecanoe @dailysignout Hi Elianna! Here is the answer from @MikeMurphy and his team: There are no regulations to our knowledge that would prevent you implementing ERBI when your heart institute relocates. #AABBPEPtalk

Kerri Wachter @knwachter
RT @sophiestaples00: Don't forget you can see how we use ERBI in our video: https://t.co/BWYx5MlsPj #AABBPEPtalk #ouhbsact

Maria Roussakis @medlabmaria
@AABB I would say that it should not be implemented in oncology clinics/ambulatory clinics for patients who have a history of multiple transfusions. It is typically this patient population that develops antibodies due to their condition or the multiple transfusions. #AABBPEPtalk

Kinjal Shah @KinjalShah_MD
@nourhisham87 @MurphyProf What is the process for returning unused products issued by ERBI? @MurphyProf #AABBPepTalk

Matthew @Matthew09351501
@AABB Matthew. Portland, OR #AABBPEPtalk

Matthew @Matthew09351501
@AABB A1 we don't do this yet. You mean having the blood in a separate location from the blood bank and dispensing from there? #AABBPEPtalk
Matthew @Matthew09351501 4 days ago
@AABB A5 I think it shouldn't be used on floors/areas where transfusion isn't a routine process. It's fine for trauma centers and cancer infusion clinics, but our orthopedic floors where they don't do transfusions daily I wouldn't trust them with the system. #AABBPEPtalk

Matthew @Matthew09351501 4 days ago
@AABB A6 not safely, no. Patients with antibodies require extra care that require trained personnel in the set up and dispense of units. #AABBPEPtalk

AABB @AABB 4 days ago
RT @cushing_melissa: @AABB #AABBPepTalk A5 we had problems with using plasma in the OR remote refrigerator. It wasn’t being used frequently...
