Last question! Q6: Is there a way to use ERBI for patients with atypical red cell antibodies? #AABBPEPTalk <https://t.co/QWtxNydGRL>

Prof Mike Murphy @MurphyProf

4 days ago

A6: UK guidelines require a serological crossmatch for patients with red cell antibodies. #AABBPEPTalk

Anas Nasir @underthe_scope

4 days ago

@MurphyProf @HermelinDaniela @AABB The way our hospital sites are set up and the way the shift works, this has been in use since way before I became a #BiomedicalScientist (longer than 6 years). As long as all members of the team are adequately trained, we rarely have issues. #AABBPEPTalk

Anas Nasir @underthe_scope

4 days ago

@HermelinDaniela @AABB As long as blood is booked into the right site and the antigen data is entered correctly, the process has multiple check steps to stop issues arising. #AABBPEPTalk

Daniela Hermelin, MD @HermelinDaniela

4 days ago

@MurphyProf @underthe_scope @AABB ☐☐ Sounds great. ➔☐☐☐☐☐☐☐☐☐☐ We should all take a field trip to Oxford and learn how to implement the system with the experts! #AABBPEPTalk @JulieStaves @sophiestaples00

@AABB @HermelinDaniela A6: Patients with antibodies require full serological testing which is done by qualified and competent staff. If there are such staff on site, why do remote issue? If not, then we do the testing and send the units over to the other site.

**Maria Roussakis** @medlabmaria

4 days ago

@AABB I would say that it should not be implemented in oncology clinics/ambulatory clinics for patients who have a history of multiple transfusions. It is typically this patient population that develops antibodies due to their condition or the multiple transfusions. #AABBPEPTalk

@AABB Matthew. Portland, OR #AABBPEPTalk

**Matthew** @Matthew09351501

4 days ago

@AABB A1 we don't do this yet. You mean having the blood in a separate location from the blood bank and dispensing from there? #AABBPEPTalk

-  **Matthew @Matthew09351501** 4 days ago
@AABB A5 I think it shouldn't be used on floors/areas where transfusion isn't a routine process. It's fine for trauma centers and cancer infusion clinics, but our orthopedic floors where they don't do transfusions daily I wouldn't trust them with the system. #AABBPEPtalk
-  **Matthew @Matthew09351501** 4 days ago
@AABB A6 not safely, no. Patients with antibodies require extra care that require trained personnel in the set up and dispense of units. #AABBPEPtalk
-  **AABB @AABB** 4 days ago
