**DONOR INCIDENT REPORT**  MD Review _____________

Donor Last Name ___________________________  First Name ______________________

ID # ___________________________  Preferred phone numbers ____________________

BUI # ___________________________  Donation date ____________________________

Date or reaction if different from donation date ____________________________

Time of reaction ___________________________  Reaction location

- □ Registration
- □ Canteen
- □ Screening
- □ Other location on site
- □ Bed
- □ Offsite
- □ Transit to canteen

Time reaction ended ___________________________

**REACTION TYPE**  all starred (*) items require a comment on reverse

- **VASOVAGAL**
  - □ VV, no LoC
  - □ VV, LoC (uncomplicated)
  - □ VV, LoC (complicated)
  - □ VV, accident/injury

- **HEMATOMA**
  - □ (non symptomatic; not reportable to AABB)
  - □ (symptomatic—pressure, pain, swelling)

- **ALLERGIC**

- □ Allergic, local

- □ Allergic, systemic

- **MISCELLANEOUS**

- □ Nerve irritation

- □ Apheresis, citrate

- □ Arterial stick

- □ Other ___________________________

**SIGNS AND SYMPTOMS**  all starred (*) items require a comment on reverse

- **VASOGLAVAL REACTIONS**

- □ cold extremities, chills

- □ feeling warm

- □ lightheaded/dizziness

- □ LoC <60 sec

- □ LoC >60 sec

- □ nausea/vomiting

- □ pallor, pale skin or lips

- □ sweating

- □ twitching

- □ weakness

- □ convulsive movements

- □ loss of bowel/bladder control

- □ bright red blood

- □ immediate, intense pain at site

- □ infiltration

- □ numbness or tingling of fingers

- □ pain

- □ pressure, swelling, tenderness (symptomatic hematoma)

- □ pulsing sensation in tubing

- □ rapid filling of blood (< 4 min)

- □ redness, warmth

- □ shooting pain down arm

- □ weakness of arm

- □ anxiety

- □ chills, shivering

- □ circulatory parasthesias

- □ muscle tightness, cramping, tetany

- □ tachycardia, irregular heartbeat

- □ twitching, tremors

- □ red plasma

- □ generalized hives

- □ generalized itching

- □ generalized rash

- □ itching at insertion/bandage site

- □ rash/hives at insertion/bandage site

- □ redness at insertion/bandage site

- □ shortness of breath

- □ wheezing

**TREATMENT**

- □ advised to take slow, deep breaths

- □ had donor breathe into a paper bag

- □ applied cool compress

- □ elevated feet

- □ fluid given p.o.

- □ saline infused  volume ___________________________

- □ wrapped with pressure bandage

- □ applied warm compress

- □ other ___________________________

**RELEASE**  Give discharge instructions at release

- □ released, unescorted

- □ released, escorted  Escorted by ___________________________

- □ released to outside medical care (name)

Medical Director’s contact #  806-679-4021

- □ Medical Director notified  Time ___________________________

Report completed by ___________________________

See reverse for Comments, Follow up contacts, and MD Comments
**Follow Up Contact**
