

2025 AABB Annual Meeting

Abstract Preparation and Submission Guidelines

This document will provide the information you need to prepare your abstract for submission to the 2025 AABB Annual Meeting.

CONTENTS

Abstract Categories and Topics	2
Abstract Timeline	3
Author(s) Responsibilities	3
How to Submit Your Abstract	4
Abstract Selection and Notification	6

Categories and Keywords

You will be asked to choose a primary category and up to five keywords. The primary category should reflect the overall topic of your abstract. Keywords should reflect other topics that are covered in your abstract submission.

Biotherapies, Cellular Therapies and Immunotherapies

Collections, Processing and Storage
Cord Blood (*includes cord tissue and perinatal cells*)
Hematopoietic Cell Therapy/
Transplant Immunotherapies
(*includes CAR T cells*)
Nonhematopoietic Cell Therapy
Process Improvement
Product Development and
Manufacturing
Quality Control/Quality Assurance
Regenerative Medicine
Regulations
Somatic Cell Therapy

Blood Center/Hospital-Based Donor Center

Blood Center/Donor Center Inventory
Management
Collections and Product Manufacturing
Component Processing
Donor Apheresis
Donor Collections
Donor Hemovigilance
Donor Recruitment and Retention
Donor Testing

Cell Biology, Immunology and Biochemistry (Basic and Preclinical Research)

Leukocytes (*includes experimental transplantation/immunotherapy*)
Platelets
Red Cells

Education/Developing Curriculum

Competency Assessment Methods
Curriculum Development,
Implementation and Evaluation
Professional Development
Training Methods for Employees,
Students, Residents and Fellows

Immunoematology and Genetic Testing (red cells, leukocytes and platelets)

Immunoematology (*includes serology*)
Molecular Diagnostics and Testing

Hematology and Coagulation

Disorders
Testing and Assay Development

Information Technology and Informatics

Advanced Computing and Security
(*includes AI, Cybersecurity, etc.*)
Data Management and Analytics
Electronic Health/Medical Records
Laboratory Information Systems

Instrumentation

Inventories

Inventory Distribution
Inventory Management
Inventory Storage

Leadership

Marketing
Operations
Strategic Planning

Management

Financial Management
Laboratory Administration
Personnel Management
Practice Management
Quality Management

Patient Blood Management

Public Health, Policy and Ethics

Quality

Laboratory Safety
Proficiency Testing
Quality Assurance
Quality Control
Quality Management Systems
Standards, Regulations and Accreditation

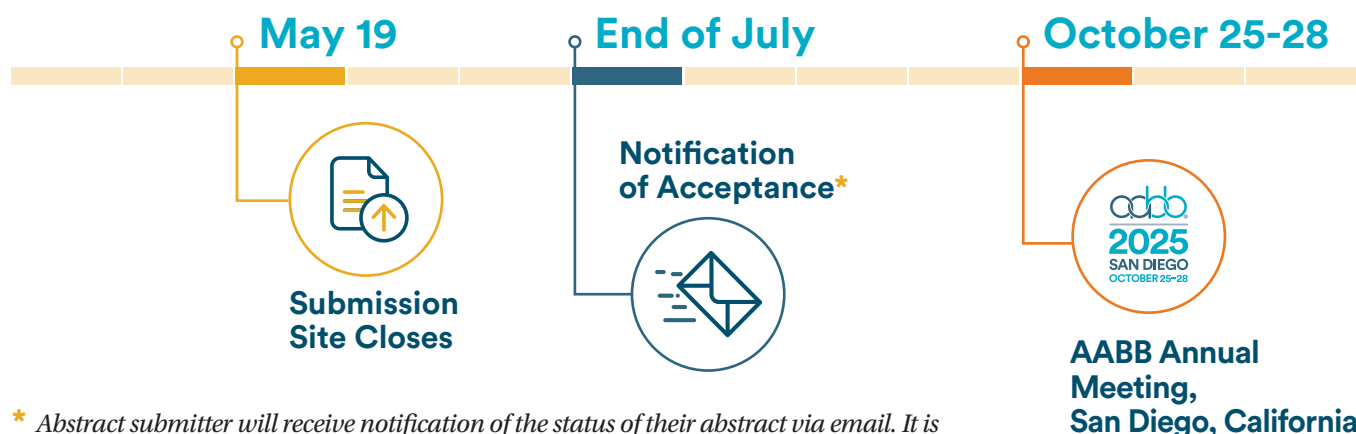

Therapeutic Apheresis

Tissue Banking and Management

Transfusion Service

Evidence-Based Medical Practices
Patient Safety
Patient Testing
Pediatric Transfusion Clinical Medicine
Perioperative and Anesthesia
Recipient/Patient Hemovigilance –
Noninfectious Adverse Events
(*Transfusion Reactions*)
Recipient/Patient Hemovigilance –
Transfusion Transmitted
Infectious Diseases
Transfusion Practices
Trauma and Massive Transfusion
Practices
Transfusion Service Inventory
Management, Storage, and
Distributions

2025 Abstract Timeline

* Abstract submitter will receive notification of the status of their abstract via email. It is the responsibility of the submitter to communicate the notification to the abstract authors.

Author(s) Responsibilities

Submission of an abstract indicates the following:

- 1 The author(s) has not published the data in a scientific journal; nor has the data been accepted for publication before the AABB abstract submission closing date.
- 2 The author(s) has not presented the data at another national or international annual scientific meeting.
- 3 The accuracy of the submitted abstract is the responsibility of the author(s). Errors made on your submitted abstract will appear in the digitally produced abstract supplement to *Transfusion* Journal and online abstract program.
- 4 Submission of an abstract constitutes a commitment by the author(s) to present it if accepted. Failure to present, if not justified, may jeopardize future acceptance of abstracts. Expenses associated with the submission and presentation of an abstract are the responsibility of the author/presenter. The presenter is required to attend the annual meeting during the day of presentation and pay the applicable registration fee. If your abstract is selected for oral presentation, the presenting author will receive a complimentary registration for the day of the presentation.
- 5 The content of the presentation and reference materials must remain the responsibility of the author(s). A commercial organization may be an author on the abstract, but they should not be biased to advance the proprietary interest of the sponsor. If the abstract is selected for oral presentation, AABB reserves the right to request that the author(s) from a commercial organization not serve as the presenting author.

How to Submit Your Abstract

All abstracts should be as informative as possible and follow the guidelines below. (Abstracts that do not follow all format guidelines will be rejected.)

1. Format

Abstracts must include the following sections:

- **Background/Case Studies** – information regarding the objectives/goals or why the study was performed.
- **Study Design/Methods** – information about the key methods utilized in the study.
- **Results/Findings** – summary of the results observed.
- **Conclusion** – a statement of the author(s)' conclusion supported by the stated results.

NOTE: Quantitative and qualitative data may be included in abstracts submissions. Quantitative data should be summarized with specific reference to numbers studied and the statistical significance of findings. It is insufficient to state: “The results will be discussed” or “The data will be presented.” A table or graph may be helpful in presenting quantitative data. For qualitative research, submissions must clearly articulate the research question, describe the study setting, and explain the data collection context, including any relationships with participants. The inclusion of qualitative data is generally most applicable to administrative categories such as leadership or donor recruitment. However, qualitative data will be considered for all abstracts, including scientific categories, when submitted as part of a well-designed, high-quality study. The quality of the data presented in each abstract is ultimately evaluated by committee.

2. Table or Figure

- A maximum of one table or figure is accepted for each abstract.
- Naming convention for table and figure – please ensure the same title is used when referencing the table and figure or table in your abstract text.
 - Please use:
 - Table 1
 - Figure A
- There are three preferred formats for digital artwork submission: Encapsulated PostScript (EPS), Portable Document Format (PDF) and Tagged Image Format (TIFF). We suggest that line art be saved as EPS files. Alternately, these may be saved as PDF files at 600 dots per inch (dpi) or better at final size. Tone art, or photographic images, should be saved as TIFF files with a resolution of 300 dpi at final size. For combination figures, or artwork that contains both photographs and labeling, we recommend saving them as EPS files, or as PDF files with a resolution of 600 dpi or better at final size.
- Tables and figures can be submitted in black and white or color. Abstracts will be published online only.

3. Additional Submission Requirements

Every effort will be made to publish the abstract exactly as submitted. Although abstracts will be typeset for electronic distribution, they will not be edited or corrected by the AABB staff except as needed to comply with publication style. Please ensure that your submission adheres to the following guidelines:

- Summary of Importance to the Field

Submitting authors will be asked to provide a brief summary (a few sentences, maximum 500 characters) about why the abstract is novel or important to the field. Although previously published work will not be accepted, as noted in the Author(s) Responsibilities, submission of follow-up studies or reexamination of data are encouraged. In these instances, it is particularly important that the author articulates what is new or different about the research in this abstract.
- Commercial Bias
 - If the presentation involves commercial products, it must be objective and rely on scientific methods.
 - Presentations must be free of commercial bias for or against any product.
 - Generic names should be used whenever possible. Abstracts submitted for promotional purposes will be rejected.
- The combined length of the abstract body and title must not exceed 2,900 characters, including spaces. The character count excludes tables, figures, and the Summary of Importance to the Field. (Character count includes all letters, numbers and punctuation.) Abstracts that exceed this limit will be rejected by the online submission site and must be modified before the abstract can be submitted.
- LMIC (Low- and-Middle Income Countries) verification

Please indicate if your research was conducted in an LMIC as classified by the [World Bank](#). The AABB Selection of Abstracts Committee is interested in understanding the location of the research.
- Titles should clearly reflect the content of the abstract. It should be concise and formatted in title case (with the first letter of each word capitalized).
- Author(s) names should not include titles or degrees. Author(s) institutions should be listed as precisely as possible (include city, state or country).
- Author(s) should include statistics, when it would permit a clearer interpretation of the data.
- All units of measure must be expressed in the metric system; temperatures in Celsius.
- Generic names of drugs must be given, typed in lower case. If the proprietary name is given, the first letter must be capitalized.
- Unless an abbreviation is widely known and accepted (Fya, CPD, HIV), the term or phrase must be written in full the first time it appears in the abstract, followed immediately by the abbreviation in parentheses, i.e., hydroxyethyl starch (HES) or filtration leukapheresis (FL). Do not use abbreviations in the title.
- Avoid starting sentences with Arabic numbers.
- Any human subjects/animal research presented must have been approved by the appropriate agencies and have been in accordance with applicable ethical standards.

- Except in rare cases, no more than ten (10) authors may be submitted and listed with each abstract. As per the rule in medical research publication, each of the authors must have contributed in at least one of three ways: 1) substantial participation in the research being reported, 2) writing of the submission, or 3) review/editing of the abstracts.
- Author(s) are strongly encouraged to save an electronic or printed copy of their abstract for their records before submitting.
- Avoid use of the first person in descriptions of the authors' previous work.

✗ **Unacceptable:** "We previously demonstrated that..."

✓ **Acceptable:** "It has been shown..." or "Investigators previously demonstrated that..."

Abstract Selection and Notification

1. Rejection Criteria

Abstracts will be rejected by peer reviewers for any of the following reasons:

- A) Insufficient data presented
- B) Statistical analysis needed, but not provided
- C) Stated conclusion cannot be reached from data presented
- D) Information previously published or generally well known and documented
- E) Format instructions not followed – no conclusion given, etc.
- F) Information has limited significance or relevance and interest for an AABB meeting
- G) Abstract poorly written, confusing or not clear, or contains major spelling or syntax errors
- H) Commercial bias/advertising
- I) Error in method or data presented
- J) Other serious flaws, in the judgment of the peer reviewers

2. Decision Notification

The submitter will receive notification of the status of their abstract via email. It is the responsibility of the abstract submitter to share the abstract notification status with the abstract authors.

If accepted, abstracts must be presented at the AABB Annual Meeting. The presenting author must register for the meeting, prepare their poster (or oral presentation if selected) and present during their assigned session time. Failure to do so, without adequate notification and justification, may prevent the authors from submitting abstracts to future meetings. All posters must be mounted throughout the duration of the designated time and may not be removed early for any reason.
