

## FDA Recognized Full-Length Donor History Questionnaire (DHQ) Flowcharts v2.1

### AABB ACCREDITED BLOOD COLLECTION FACILITIES SHOULD USE THE FOLLOWING FDA RECOGNIZED DHQ FLOWCHARTS v2.1, *with PrEP/PEP/ART including injectable PrEP*:

- These DHQ Flowcharts v2.1 are consistent with the recommendations of [Association Bulletin #22-03](#), *Updated Recommendations on Donor Deferral for Use of Antiretroviral Medications for HIV Prevention and Treatment including Long-Acting Injectable PrEP and the Impact on Blood Safety*;
- Assess donor eligibility for individuals taking antiretroviral medications to prevent sexual transmission of human immunodeficiency virus (HIV), or for treatment of HIV infection:
  - Pre-exposure prophylaxis (PrEP) taken by mouth (oral) and by injection
  - Post-exposure prophylaxis (PEP)
  - Antiretroviral therapy (ART)

- [Toolkit and Example Documents for Use with DHQ v2.1](#): includes examples of an acceptable approach for implementation of the recommendations in [Association Bulletin #22-03](#).

### [FDA Recognized DHQ Flowcharts v2.1](#)

- Approved by FDA but do not include PrEP/PEP/ART
- AABB does not recommend using DHQ Flowcharts v2.1 without PrEP/PEP/ART
