Basic Information

February 2022 Metrics Survey

Please refer to the glossary for all terms in orange: Survey Definition

Download: Monthly survey questionnaire

Please report for the month of February 2022.

Name of Institution

Have you completed the baseline survey?

- Yes
- No

You may proceed with the monthly survey, but please do not forget to complete the baseline survey using the survey link below:
https://aabb.az1.qualtrics.com/jfe/form/SV_cRWHQ1pEfj16MBg

Which of the following best describes the institution for which you are completing the survey?

- Hospital transfusion service with an on-site donor collection facility
- Hospital transfusion service with no donor collection on-site
- Blood collection center
To be completed by all hospital transfusion services

Monthly Hospital Transfusion Services Questions

Please refer to the glossary for all terms in orange: Survey Definition

What was your hospital's average daily census over the full calendar month of February 2022?

- <10
- 10-49
- 50-99
- 100-199
- 200-499
- 500-999
- ≥ 1,000

How does your average daily census of the full calendar month of February 2022 compare to the month before?

- Lower
- Similar
- Higher

How many surgeries did your hospital perform during the full calendar month of February 2022?

- <10
- 10-49
- 50-99
- 100-199
- 200-499
Monthly questions

1. How many platelet units did your hospital transfuse during the full calendar month of February 2022? [Unit=Single apheresis unit/ equivalent standard size pooled whole blood derived platelets/ prepooled whole blood derived platelets(Acordose)]

2. How many low yield platelet units did your hospital receive from your blood supplier during the full calendar month of February 2022?

3. How many group O RBC did your hospital transfuse during the full calendar month of February 2022?
   i. Group O+
   ii. Group O-

4. For hospital platelet wastage during the full calendar month of February 2022:
   a. Approximately how many units of platelets did your hospital waste due to outdate?
   b. Approximately how many units of platelets did your hospital waste for other reasons (see definitions)?

5. Did your hospital manufacture (split) low yield platelet units due to platelet inventory concerns in February 2022?
   - Yes, 11 or more units were split in the full calendar month of February 2022
   - Yes, 5 -10 units were split in the full calendar month of February 2022
   - Yes, 1-4 units were split in the full calendar month of February 2022
   - No, we did not split platelet units due to inventory concerns in the full calendar month of February 2022
   - No, my hospital lacks the capacity to split platelet units

While providing data on platelet units- do not include aliquots for pediatric patients (unless specified).

Please provide numeric value only without any sign e.g., %
6. Did your hospital receive blood from a secondary supplier because the primary supplier could not fill your order?

- Yes, 11 or more times in the full calendar month of February 2022
- Yes, 5-10 times in the full calendar month of February 2022
- Yes, 1-4 times in the full calendar month of February 2022
- No, we didn't use a secondary supplier the full calendar month of February 2022

7. How often did an incomplete RBC order delay a transfusion or create the need to modify component(s) to fill the order, over the full calendar month of February 2022?

- More than 10 times/month
- Approximately 6-10 times/month
- Approximately 1-5 times/month
- 0 times/month
- We do not track this

8. How often did an incomplete platelet order delay a transfusion or create the need to modify component(s) to fill the order, over the full calendar month of February 2022?

- More than 10 times/month
- Approximately 6-10 times/month
- Approximately 1-5 times/month
- 0 times/month
- We do not track this

9. How many Massive Transfusion Protocols (MTPs) were called over the full calendar month of February 2022?

- 0
- 1-5
- 6-10
10. Did you alter the MTP workflow in any way due to concerns over the inventory?

☐ Yes. Please give details. 

☐ No

To be completed by blood centers and hospitals with collection facilities

Monthly Collection Questions

1. During the full calendar month of February 2022, what percentage of platelets collected were:

If you don't collect platelets, please enter 100 for option c. Don't collect Platelets.

a. Apheresis

b. Whole blood-derived (WBD)

c. Don't collect platelets

Total

Please provide numeric value only without any sign e.g., %

(For data element you don't track, please fill-in "N/A")

2. How many labeled apheresis platelet units did you manufacture during the full calendar month of February 2022?

a. How many labeled WBD platelet (individual) units did you manufacture during the full calendar month of February 2022?
3/14/22, 9:49 AM

8. Did you meet your target for donations for platelets and Group O RBCs during the full calendar month of February 2022? *

8a. What percentage of your platelet target for collection was reached? *

8b. What percentage of group O RBC target for collection was reached? *

b. How many labeled WBD pools did you manufacture during the full calendar month of February 2022? 

Please provide numeric value only without any sign e.g., % (For data element you don't track, please fill-in "N/A")

c. How many labeled prepoold WBD (Acrodose) platelets did you manufacture during the full calendar month of February 2022?

d. On average, how many WBD units are present in your Acrodose pools?

3. What was your split rate during the full calendar month of February 2022?

4. Of the total labeled apheresis platelets (question 2), how many platelet units did you treat with Pathogen Reduction Technology (PRT)?

   a. What was your split rate for PRT units?

5. How many labeled platelet units did you waste due to outdate during the full calendar month of February 2022?

6. How many labeled group O RBC units did you manufacture during the full calendar month of February 2022?

   a. Group O+
   b. Group O-

7. What was your target for donations during the full calendar month of February 2022? *

8. Did you meet your target for donations for platelets and Group O RBCs during the full calendar month of February 2022? *

   

8a. What percentage of your platelet target for collection was reached? *

8b. What percentage of group O RBC target for collection was reached? *
What was your blood collection center fill rate the full calendar month of February 2022? If you are not able to differentiate fill rates for STAT vs standard orders, please fill-in "N/A" for these data elements.

<table>
<thead>
<tr>
<th>% collection reached</th>
</tr>
</thead>
<tbody>
<tr>
<td>(For data element you don't track, please fill-in &quot;N/A&quot;)</td>
</tr>
</tbody>
</table>

<table>
<thead>
<tr>
<th>i. Total group O RBC target</th>
</tr>
</thead>
<tbody>
<tr>
<td>ii. Group O+ RBC target</td>
</tr>
<tr>
<td>iii. Group O- RBC target</td>
</tr>
</tbody>
</table>

*Question displayed to hospitals with collection facilities.

What was your blood collection center **fill rate** the full calendar month of February 2022? If you are not able to differentiate fill rates for STAT vs standard orders, please fill-in "N/A" for these data elements.**

a. Monthly Fill Rate
b. For standard orders (within 8 hours)
c. For Emergent/STAT orders

**Question displayed to blood centers**
